The service life of solar panels on roofs

Overview

Typically, solar panels last between 25 to 30 years, but various factors can affect their durability and performance over time. Higher quality panels generally last longer with better efficiency retention. Proper installation avoids physical damage and ensures optimal positioning. Solar panels are durable devices with simple maintenance needs, and there are now many brands that offer 25-year product warranties. Understanding the life expectancy of solar panels on a residential roof is essential for maximizing investment value and planning future energy needs.
