

**Espay Solar Energy S.L.**

# **Turkish Solar System**

## Overview

---

Solar power is a growing part of renewable energy in the country, with almost 25 gigawatts (GW) of solar panels in 2025, of which 22 GW is commercial and industry rather than traditional power companies or residential rooftop solar as in many other countries. Türkiye's cumulative solar capacity reached 22,648 MW at the end of May, according to figures released by the government's Ministry of Energy and Natural Resources. The sector's meteoric rise, detailed. Turkey has emerged as one of the most dynamic and promising solar energy markets globally, with exceptional solar resources averaging 2,740 hours of sunshine annually and radiation levels reaching 1,527 kWh/m<sup>2</sup>. By 2025, the country is projected to exceed 18GW of installed solar capacity. Türkiye has doubled its solar capacity in just 2.5 years, surpassing its current target more than a year ahead of schedule.

## Turkish Solar System

---

### Solar power and Turkey's clean energy transition

Over the past decade, Türkiye has more than tripled its renewable energy production, has announced an ambitious objective of adding an additional 60GW of wind and solar by 2035, ...

### Türkiye surpasses 2025 solar target as capacity doubles in 2.5 years

Türkiye has doubled its solar capacity in just 2.5 years, surpassing its current target more than a year ahead of schedule. The progress underlines the opportunity for an upgraded target in its ...

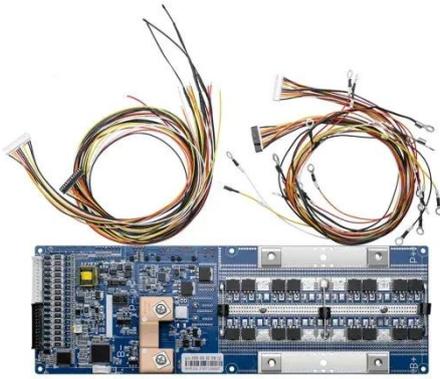

### Türkiye installed around 2.8 GW of solar in first five months of 2025

A strong start to solar installations in 2025 helped the country's cumulative solar capacity surpass 22.6 GW by the end of May. Türkiye's cumulative solar capacity reached 22,648 MW at the

## Top 10 Solar Companies in Türkiye

## [Updated 2025]

Complete guide to Turkey's leading solar companies in 2025. Detailed analysis of Kalyon Enerji, Smart Solar Technology, Grace Solar, and other market leaders. Includes manufacturing capabilities, ...

## Turkish lessons: Solar system

From the Sun, the center of our solar system, to the planets that orbit it, this Turkish lesson will equip you with the Turkish vocabulary to understand our immediate cosmic environment.

## The Power Of Solar Energy In Turkey

Turkey's installed solar capacity exceeded 10 gigawatts in 2023, accounting for more than 10% of the country's total installed capacity for the first time. The progress made since 2015 has enabled Turkey ...

## Solar power in Turkey

Solar power is a growing part of renewable energy in the country, with almost 25 gigawatts (GW) of solar panels in 2025, of which 22 GW is commercial

and industry rather than traditional power companies ...

### Turkey's installed solar capacity reaches 12.2GW

Turkey's installed solar capacity has surpassed wind thanks to the addition of hybrid projects, as the country boasted 12.2GW of installed solar capacity as of early 2024.

### Turkey's Solar Capacity Surges Past 21.6 GW as Unlicensed ...

Analysts project the unlicensed solar segment to reach 40 GW by 2030, provided grid infrastructure keeps pace. Turkey's solar irradiance averages 1,500-1,700 kWh/m<sup>2</sup> annually, ...

### Saudi Arabia to Invest \$2 Billion in Turkish Solar Projects

Saudi Arabia will invest around \$2 billion to build solar power plants in Turkey, in the first stage of a broader renewable-energy deal between the countries.

Turkish energy stocks rose on the ...
