# **UK battery storage costs**

## Overview

---

The average home battery storage cost typically ranges from £1,799 (4kWh) to £3,599 (10kWh). Prices vary depending on the battery size, brand, and additional equipment such as inverters or smart meters. However, a more precise way to assess their value is by using the £/kWh metric, which stands for price per kilowatt-hour of storage. This pricing can vary between £265. Adding battery storage to your solar panel system has become increasingly popular, with around 94% of new UK solar installations now including a battery. But with prices ranging from £3,000 to over £10,000, understanding whether the investment makes financial sense for your household requires. The UK energy landscape has transformed dramatically in recent years, with home battery storage emerging as one of the most compelling investments for homeowners looking for more sustainable and future-proof systems. As electricity prices continue to soar at around 25.0% VAT on installs until 31 March 2027. Best value if you have solar PV, use a smart time-of-use tariff, and/or run an EV or heat pump.
