

Espay Solar Energy S.L.

Uninterruptible power supply 12 hours

Overview

Equipped with a DC9V output and double DC12V ports, this small size uninterruptible power supply simultaneously power devices like ONU and WiFi routers, offering versatile connectivity and broad compatibility with all router brands. Instantaneous backup power for your emergency VoIP systems and router/modems. The APC Back-UPS Connect CP12142LI is an uninterruptible power supply (UPS) that is specially designed to power compatible router/modems and VoIP telephony systems in case of emergencies for prolonged periods of time. The CyberPower LE1000DG is the best UPS for people who want to back up a few small electronics — such as a modem, router, PC, external hard drive, or game server — during a blackout lasting up to three hours. It offers many of the same premium features found in pricier models, including battery. An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. For home users, a UPS can protect desktop PCs, gaming consoles, and smart home devices from unexpected power cuts.
