Vietnam container power generation price

Overview

The 2026 Pricing Puzzle Current power container quotations hover around \$400/kWh in Vietnam. But market analysts project this could drop to \$285/kWh by 2026 through three key drivers: Let's break this down. The revised pricing methodology details how investment costs, discount rates, loan interest, and capital structure are determined, with clearer data sources and legal bases to improve transparency and implementation. According to Circular 09, before 1 November of each calendar year, Electricity of Vietnam ("EVN")¹ will either, itself, determine or will engage an independent valuer to determine the price frame at which EVN purchases electricity from. In 2023, power shortages were estimated to have cost Vietnam's economy an estimated US\$1. This is in large part because EVN. - On April, the Ministry of Industry and Trade (MOIT) officially issued Decision No. 1198/QĐ-BCT, approving the electricity generation price framework for pumped storage hydropower plants for the year 2025.
