Overview

Explore our range of solar power cabinets, designed for efficient energy storage. Perfect for commercial and industrial applications. Hybrid cabinets combine solar energy, battery storage, and grid. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. Equipped with a reliable Growatt inverter, it supports flexible battery options including rack-mount and stackable batteries. The outdoor cabinet is weatherproof. AZE's heavy duty outdoor battery enclosures and Lithium battery storage system are available in NEMA 3R, or 4X configurations. With IP54/IP55 protection, anti-corrosion design, and intelligent temperature control, they are ideal for telecom base stations, remote power supply, and containerized microgrids. Designed for harsh environments and seamless integration, this IP54-rated solution features a 105KW bi-directional PCS, optional air- or liquid-cooled thermal.
