on the other side of the road?

on both sides of the road?

Find out in this video what to do, so that you can easily negotiate this hazard on. Airway obstruction is a blockage of airflow to your lungs. It makes it hard to breathe, speak and swallow. Treatment depends on the cause — providers may force the blockage out, surgically remove it or reduce swelling with medications. Airway obstruction is an emergency. Call 911 or get immediate. Airway obstruction is a potentially life-threatening condition that occurs when the normal flow of air into and out of the lungs is partially or completely blocked. There are multiple. On occasion, either the bone or the cartilage or both can be deviated to one side, and therefore result in obstruction of the nasal passages. Bowel obstruction, also called intestinal obstruction, is a partial or complete blockage of the small or large intestine that results in food or fecal matter being unable to move through the.
