# **What to do with rust spots on photovoltaic panels**

## Overview

---

If solar photovoltaic panels are rusted, 1. inspect for underlying issues, 3. Rust on solar panels can indicate neglect in maintenance or exposure to harsh environments. Rust can greatly impact the efficiency and life span of panels. This topic is particularly relevant for: What Causes Rust on Solar. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Rust has leaked from the tiles onto the panels. Does anyone know how to get this off ?

Depends on what's facing your panels, glass or polymer. Turn over the cloth. However, solar panels are designed to resist rust, with vacuum-sealed modules and anodized aluminum frames. Solar panels also have protective layers like durable glass, insulation, and back sheets.
