Where to sell solar power generation

Overview

If your asset is connected to the grid, then the simple answer is yes – you can sell any surplus power you generate back to the grid with the help of your existing import (domestic supply) supplier or by arranging an export power deal with a different supplier (various rates. If your asset is connected to the grid, then the simple answer is yes – you can sell any surplus power you generate back to the grid with the help of your existing import (domestic supply) supplier or by arranging an export power deal with a different supplier (various rates. Solar energy represents a form of renewable energy derived from sunlight through the use of solar panels that turn sunlight into electricity. These systems effectively convert sunlight into electricity. This eco-friendly option has gained traction as a sustainable solution for minimizing dependence. Harnessing the power of the sun through solar panels not only reduces your electric bill and decreases your carbon footprint but can also turn into a source of income. For starters, you can turn off the lights when you leave a room. But did you know that you can also make money from the electric company?

This involves selling electricity back to the company's grid, if you have excess from your renewable. The short answer is—yes, many utility companies do pay for excess solar energy., the Public Utility Regulatory Policy Act (PURPA) dictates that electric utilities on the traditional power grid must purchase the excess electricity that renewable energy systems generate. It's a way of encouraging renewable energy production without requiring utilities to invest in.
