# **Will solar panels only use 220V to generate electricity**

## Overview

---

Well, here's the thing—photovoltaic panels naturally produce DC electricity, typically ranging from 12V to 48V. This fundamental mismatch creates both technical challenges and opportunities in renewable energy. You may be wondering if you can still use all of your normal 110V / 120V /220V AC appliances if you have solar panels. With advanced technology. Plug-in solar panels for a 220V socket are an accessible solution. Proper Inverter Selection: The inverter is essential for converting DC to 220V AC. Ideal for regions like China, Europe, Asia, Africa, and most of South America that use 220V mains electricity, these powerful, portable systems offer a clean, quiet, and dependable alternative to traditional power sources. But wait, no—actually, household appliances require 220V AC power. This fundamental mismatch.
