Zambia New Energy Storage Project

Overview

Government endorses EPC agreement for 50 MW solar and battery storage project in Luapula Province. Investment strengthens private sector participation in Zambia's power sector. Battery supported generation to improve grid stability and regional electricity supply. Zambia has taken a further step. Zambia has just launched an Expression of Interest (EOI) program led by The Zambia National Energy Corporation Limited (ZNEC). Households were left in the dark, industries slowed and the risks of relying on hydropower for more than 80% of electricity. Zambia inaugurated a 20 MW solar photovoltaic plant in Lusaka to diversify its power mix amid climate-driven hydropower constraints. Kiyona Energy, a ZESCO subsidiary, developed the project and will allocate 2 MW directly to the Natural Resources Development College. The facility has been touted as Zambia's first solar plant w critical mineral mines in the Democratic Republic of will be important for mitigating power according to the International Renewable Energy Agency (IRENA).
