# **Zimbabwe energy storage policy updates**

## Overview

---

- The government has set a target of “renewable energy accounting for 27% by 2030”, and household photovoltaic + energy storage systems can enjoy a 15% import tariff reduction (Zimbabwe Energy Policy White Paper, 2023). From this renewable power generation potential, the council noted 600MW would come from solar, geothermal (50MW), biomass (1 000MW), small hydro (120MW), and wind (100MW), THE Renewable Energy Association of Zimbabwe (REAZ) is actively lobbying for enhancements to the National Energy Policy and. The energy landscape in Zimbabwe is undergoing a transformative shift, driven by the ambitious framework known as Zimbabwe's National Renewable Energy Policy. International aid programs, such as the EU's Africa Energy Initiative, provide. Describing the policy review as a “strategic turning point,” Minister Moyo said the revised energy policy laid the groundwork for a brighter, cleaner and economically viable future, aligned with national goals and global energy trends. “This gathering is more than just a review of a policy. The Ministry of Energy and Power Development is uniquely positioned to address Zimbabwe's power challenges. As the entity responsible for regulatory authority and energy policy development, the Ministry can implement critical reforms to stabilize the energy sector, promote renewable energy, and. Zimbabwe has launched a fresh push to reshape its energy landscape as the country battles ageing infrastructure, rising demand, intermittent supply and the growing threat of climate change.
